André Sousa

AI and Data Science Undergraduate Student

Profile

Quick learner and task-driven undergraduate student passionate about problem-solving, programming and algorithms. Adaptable, inspired and eager to use my knowledge in innovative and exciting opportunities that allow me to further develop my abilities

Education

Socioeconomic Sciences, High School

2018-2021

Colégio Paulo VI

- Throughout this period, I studied Math and social sciences such as Geography and Economics. Even though I found those interesting, I was able to realise **that was not what I wanted for my future** and would rather seek a **career in the hard sciences**
- At the same time, I took part in a volunteering project organized by the school and had the opportunity to **tutor a younger student and organize social events**
- I was able to graduate with a grade of **19.5**
- Looking back, even though I don't use some parts of the knowledge I acquired, I don't see it as a waste of time, but rather as a **necessary step to find the right path**

AI and Data Science, BSc

2021-2024

University of Porto

- During this time I have been developing a solid foundation in **Computer Science**, as well as diving deeply into **AI and Data Science** topics
- I worked on a variety of projects (**that are available on my github**) about different areas of Informatics and created my own implementations of some well known problems
- I have now finished my second year and currently hold a grade of **17.75**
- Next year I'm looking forward to further learning about **machine learning algorithms and practices, large scale data and robotics**

Last Honors

2021/2022

University of Porto

STEAM Merit Scholarship

I was awarded this scholarship for my overachieving results during my first year at university.

2021

Colégio Paulo VI

High School Honor Student

I received this honor as a recognition of my hard-work and great results during my high school years.

Relevant Experiences

First Cambridge Exam

2021

I scored 184 in the FCE, which means I qualify for **C1 level** on the CEFR scale. I am now able to comfortably communicate in English.

Erasmus+

2018/2019

I got to meet international students in Budapest, Hungary and got to exchange experiences and future prospects.

Student Exchange Program

2018

My family hosted a French student and I stayed at his house a few months later. I got to develop adaptability and communication skills.
